JOURNAL OF MOLECULAR LIQUIDS

Contents of Volume 51

Translational contribution to incoherent neutron scattering in anisotropic fluids—new theoretical approach
I. Dozov and N. Kirov (Sofia, Bulgaria) and S. Temkin (Novosibirsk, Russia) 1
Electrolyte–acetamide molten mixtures
G. Berchiesi, M. De Angelis, G. Rafaiani and G. Vitali (Camerino, Italy) 11
CF_3COONa aqueous solutions: excess sound absorption
G. Berchiesi and F. Farhat (Camerino, Italy) 39
Ternary system composed of H_2O, N-methyl morpholin N-oxide and NaSCN: ultrasonic investigation
G. Berchiesi, F. Farhat, F. Castellani and G. Vitali (Camerino, Italy) 51
A microscopic simulation of solvent reorganization in heterogeneous hydroxonium discharge depending on the interface polarizability and the distance to interface
L.L. Edelstein, I.I. Sheykhet and B.Ya. Simkin (Rostov-on-Don, Russia) 59
Infrared study of the proton acceptor ability of 1-pyrrolidine-carboxaldehyde
K. De Wael, J. Parmentier and Th. Zeegers-Huyskens (Heverlee, Belgium) 67
On the calculation of the linear dielectric response from the Langevin equation in the presence of a step-on field
W.T. Coffey (Dublin, Ireland) 77
Surface organization of dipole monolayers
S. Cincotti, M. Parodi and A. Chiabrera (Genoa, Italy) 89
Studies of rotational relaxation times at low viscosity: ethane
S.L. Whittenburg, R.F. Evilia and J.R. Robert (New Oreleans, LA, USA) 115
Stability of coated and slightly charged silica particles under pressure: a light scattering study
P. Bezot, C. Hesse-Bezot (Nice, France) and J. Bommelaer (Monaco) 123
Application of the Langevin dipoles and virtual charges to study of the effects of equilibrium and non-equilibrium solvation
L.L. Edelstein, I.V. Dorogan, B.Ya. Simkin and I.I. Sheykhet (Rostov-on-Don, Russia) 139
Some aspects of the homogeneous (chemical) electron exchange near an interface
B.Ya. Simkin, I.I. Sheykhet and L.L. Edelstein (Rostov-on-Don, Russia) 161
Theoretical aspects of the homogeneous electron transfer reaction kinetics in electrolytes containing chlorohydrogen
L.L. Edelstein, I.I. Sheykhet, V.N. Levchuk, B.Ya. Simkin, N.M. Gontmacher and O.I. Barteneva (Rostov-on-Don, Russia) 181
Molecular dynamics in supercooled liquids: a study of the relaxation in binary solutions
S.S.N. Murthy (New Delhi, India) 197
Measurements of anisotropic Rayleigh scattering of some pure liquids
H. Wahid (Assiut, Egypt) 219
Computer simulation of circular dichroism and optical rotatory dispersion
M.W. Evans (Zurich, Switzerland) 231
Orientational anisotropy induced by the interaction of a laser with a permanent electric dipole: an FMD simulation
M.W. Evans (Ithaca, NY, USA) 245
Structural study of amide–water mixtures using dielectric relaxation technique
A.C. Kumbharkhane, S.M. Puranik and S.C. Mehrotra (Aurangabad, India) 261

Dielectric properties of binary systems 10. Ideal dielectric behavior and excess dielectric properties
A.H. Buep (Buenos Aires, Argentina) 279
Dielectric relaxation study and structural properties of 2-nitroacetophenone–ethanol solutions from 10 MHz to 10 GHz
A.C. Kumbharkhane, S.M. Puranik and S.C. Mehrotra (Aurangabad, India) 307
